New Timetable 20th May 2018 **Redhill to Brighton**

Surprisingly, this is actually a much better service than expected.

Looking at NRE the disappointment is there but when you look at a more detailed view you realise an excellent connection is set up through the day on the return journeys.

If you catch the regular Gatwick Express from Brighton at xx:18 and xx:48 it is programmed into platform 1, which is also where the Horsham to Peterborough train calls 8 minutes later giving a same platform fast change at Gatwick. NRE needs 10 mins to allow a connection so doesn't show this link but it works and would work even if the GatEx arrived at platform 4 as it does now.

That's great for Horley, Redhill, Merstham customers but not so good for Earlswood and Salfords where you have to wait for next Bedford so probably an extra 5-10 on your journey, sorry.

Going in the morning the connections keep current times of around 50 minutes but we lose the direct trains.

Off peak – it takes around 50-60 minutes outward and 43 Back. The GWR from Redhill is the fastest accepted standard connection at 50 minutes. However you can do 42 minutes to Brighton if you can change in 4 minutes at Gatwick from platform 2 to platform 7 off the xx:25/55 from Redhill (xx:28/48 Earlswood) – not one for the less able, carrying children or cases.

Last Train back is 00:04 Thameslink from Brighton daily and it calls at Horley and Redhill
